

THE SNAP

THE NEW CLICKABLE CABLE TRAY

- QUICK ASSEMBLY
- STRONG 'I SHAPED' PROFILE
- HIGHER CAPACITY
- SAFE TO USE

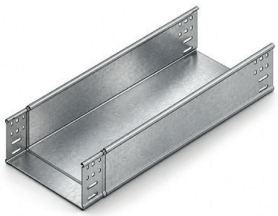

Trayco®
MASTERS IN CABLE MANAGEMENT

EN

THE SNAP

A smart cable tray system that clicks together in one simple movement.
Thanks to its snap-fit design, installation is faster, cleaner, and more effcient.
Ideal for projects where speed and a neat finish matter.

Super fast
Fast coupling with integrated locking system allows trays to be connected in one click.

Stronger profile
The patented I-profile design makes the cable tray exceptionally robust.

Extra safe
The rolled edge ensures additional safety during installation and use.

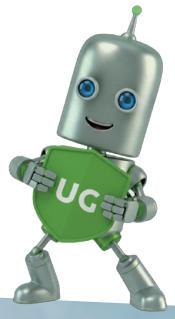

Fire resistant (DIN 4102-12)
The fire-resistant design helps the system maintain its structural integrity in case of fire

LOAD PERFORMANCE

ULTRA GALVA

A high-performant metallic coating which offers optimum surface protection in a wide variety of aggressive and demanding environments, indoors as well as outdoors. The better alternative to hot-dip galvanizing. More environmentally friendly and more resistant.
